Gulf Gaihab International

Gaihab
Get The Future You Want

Company Overview

We are Gulf Gaihab International (subsidiary member of Al Abdulkarim Holding Group) and we provide communications and network infrastructure solutions, as well as design, supply and installation of all low-current systems.

As we have maintained a reputation for being a reliable partner, our customers continue to approach us with their projects.

Since having more than 20 years of experience in both the public and private sectors in Saudi Arabia, we have worked with retailers, manufacturers, industrial companies, universities and colleges, royal palaces, villas, as well as oil and gas companies.

Message from CEO

We have a clear vision of what we want and planned to be a leader in Comprehensive technology solution.

GGI Works heavily to satisfy & meet the needs of local clients by:

- Partnering with the best global software and hardware vendors. Leading customer engagements with value-added services.
- Relentlessly hiring and training the specialized resources needed to deliver consistent quality.

We are Proud of the work & efforts we do, and we give our customers a Personal commitment to deliver on our promises.

CEO OF Gulf Gaihab International

Faisal Al-Abdulkarim

Our Vision

To be leader in providing innovative information and Communication technologies Solution (ICT), and to Provide quality solutions & services at a reasonable price and achieve customer expectation and needs

Our Mission

GGI is committed to deliver a wide range of user-friendly Telecommunication system infrastructure solutions & services to our customer anywhere in KSA giving the customer the freedom to choose and be in control.

Also, to enable our customer to achieve their objectives and targets by providing best in class solution and services as trusted reliable partners with well know Market Vendors.

Making the future happen faster!

Offering expertise in consulting to create sustainable and cost-effective solutions with a global perspective.

Our Goals

Making the future happen faster !

Improved customer experience

Higher process efficiency

Increased agility

Business process improvement

COMPANY VALUE

Highly qualified certified well-trained engineers provide expert advice & solutions as Per Customer requirements.

Providing Competitively Priced Solution supported with Technical Description Details.

Full warranty & Maintenance on all provided services by Professional team .

True collaboration with customers & partners.

we are on a mission to create a secure digital world for our customers, our industry, and our communities.

We do this by embracing tenacity, passion, and collaboration to challenge what's possible and drive extraordinary impact.

We envision building a new future by harnessing the potential of technology !

Internet of Things (IoT) Services

On a Mission to Build Sustainable Future!

At GGI, we drive value-centered IoT solutions and build multi-level data pipelines for that: from edge computing to cloud data processing and data science.
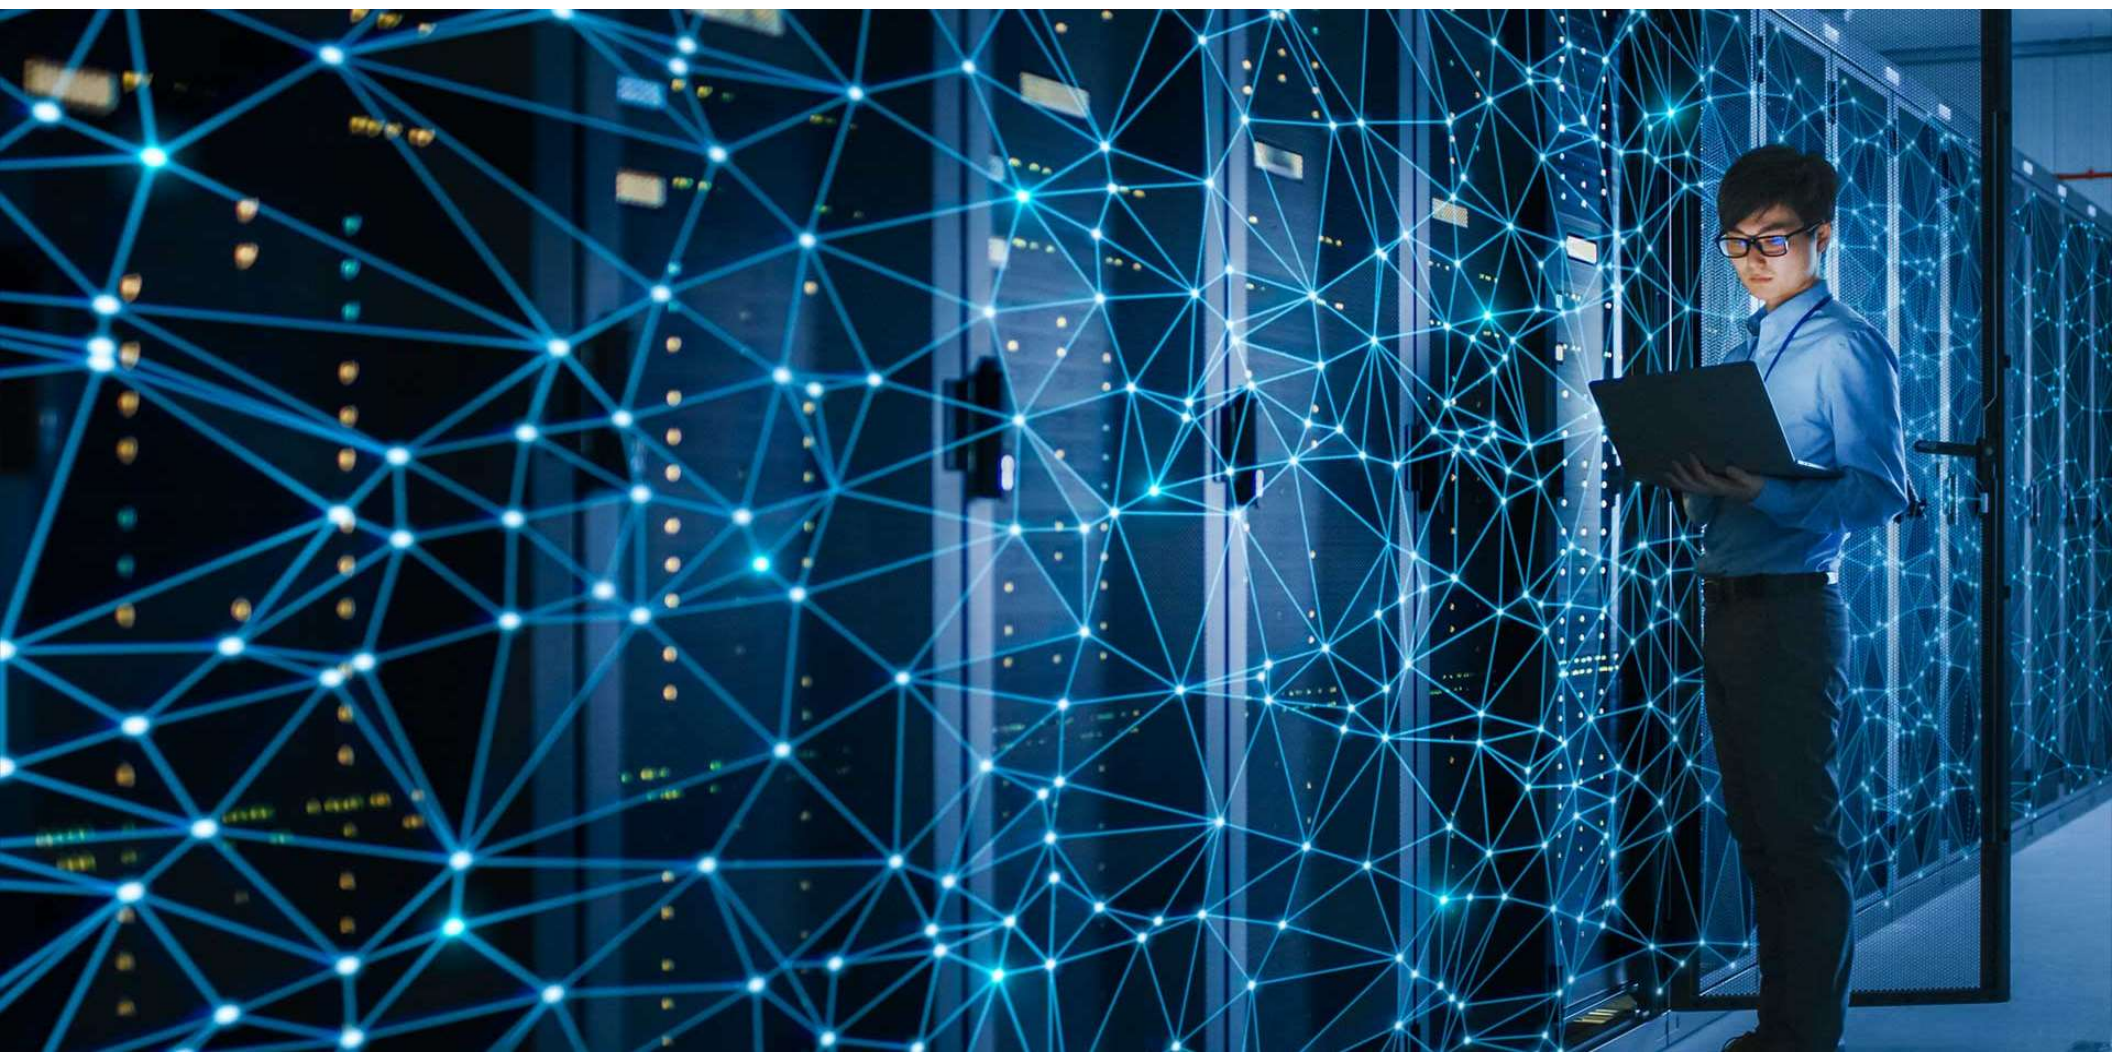

IoT
SOLUTIONS

Our services include:

- Preventive equipment maintenance.
- Remote operation of machinery / appliances.
- Environmental monitoring.
- Optimization of energy consumption.
- Hands-off inventory management.
- Remote health monitoring.
- Video surveillance and real-time alerts.
- Product quality management.
- Connected transport.
- Usage-based service pricing.

Explore how to automate the data center, including its traditional four-wall setup and its evolved ecosystem of physical, virtualized, and public cloud-based systems.

Data Center

Automating The Modern Data Center!

The fractured nature of the IT automation application market makes it difficult to know where and what can be run without human intervention. Fortunately, to adapt to hybrid IT environments, some software vendors have evolved their capabilities.

Generally, there are three approaches:
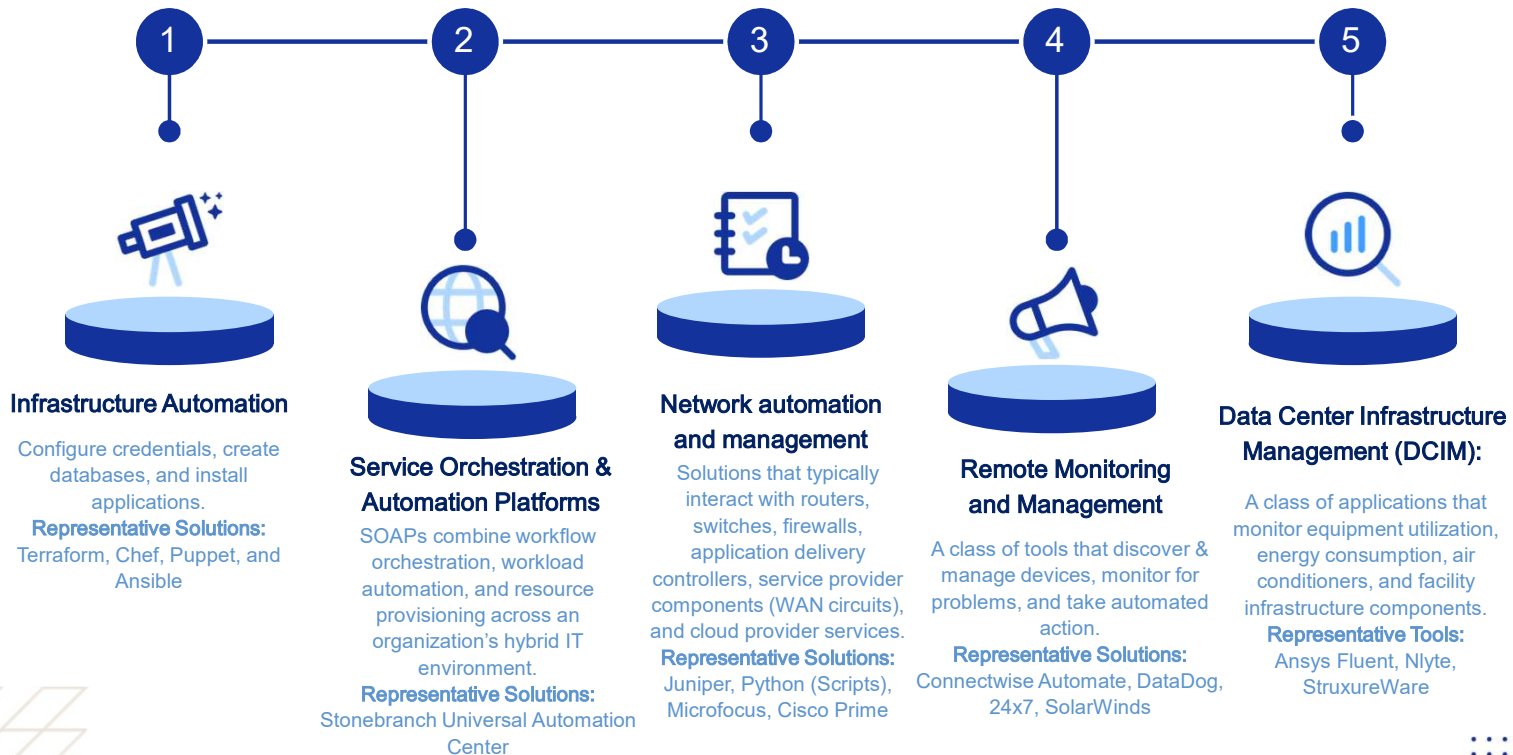

• Traditional on-premises-focused applications that cannot reach the cloud

• Cloud schedulers focused on cloud-only automation

• Automation and orchestration platforms that centralize the management of both on-premises and cloud workloads

Data Center Categories

There are several different application categories to consider when automating the data center.

1   **2**   **3**   **4**   **5**

Infrastructure Automation

Configure credentials, create databases, and install applications.
Representative Solutions:
Terraform, Chef, Puppet, and Ansible

Service Orchestration & Automation Platforms

SOAPs combine workflow orchestration, workload automation, and resource provisioning across an organization's hybrid IT environment.
Representative Solutions:
Stonebranch Universal Automation Center

Network automation and management

Solutions that typically interact with routers, switches, firewalls, application delivery controllers, service provider components (WAN circuits), and cloud provider services.
Representative Solutions:
Juniper, Python (Scripts), Microfocus, Cisco Prime

Remote Monitoring and Management

A class of tools that discover & manage devices, monitor for problems, and take automated action.
Representative Solutions:
Connectwise Automate, DataDog, 24x7, SolarWinds

Data Center Infrastructure Management (DCIM):

A class of applications that monitor equipment utilization, energy consumption, air conditioners, and facility infrastructure components.
Representative Tools:
Ansys Fluent, Nlyte, StruxureWare

SERVICES and SUPPORT

Every problem has a solution and that's us !

- Design, Consultancy & Documentation
- Site Survey & RF Planning & Coverage
- Project Management
- Installation, Termination, testing & commissioning
- Site Mobilization
- Site Acceptance Test

Professional
S e r v i c e s

Offers high quality advisory, consultancy, and system implementation services across the complete spectrum of information technology domains.
